

## ACE Academy eMentor Program Kicks Off!

Dear ACE Academy Partners and Colleagues,

At long last, we celebrate with you the kick-off of our ACE Academy eMentor program! We thank you so much for your ongoing support of ACE and hope that you or a colleague you know will be willing to help our students benefit from your knowledge and experience by becoming an eMentor. It will take a few minutes of your time every other week or so. Your emailed response to this letter will confirm your participation and correct email address to be used for the eMentor program. We'd also appreciate a 'no thanks' email if, at this time, you do not wish to participate.

We have been working to create an efficient and secure process that will maximize our students' ability to learn from you while being easy and schedule-friendly for you.

Here's how the eMentor program will work:

- ✦ You will be part of an eMentor team that includes professionals across sectors of Architecture, Construction, Engineering, and the professions that are related to these sectors; i.e., developers, planners, estimators, marketers, green building experts and you other fabulous industry folks!
- ✦ Your team will be matched with a mixed-discipline team of students (across A, C, and E) and they will pose one or a set of questions to you about every other week. The process will allow you to respond to the questions as you have time to do so.
- ✦ When we get your confirmation via your email back to Jan Wierima with the email address you wish to use, we will send you the instructions for logging on to the Moodle software we will be using for the eMentor program. Jan's email is [jan@acecharterschool.org](mailto:jan@acecharterschool.org).
- ✦ If you know of other colleagues who might like to be ACE Academy eMentors, please either forward this letter to them or send us their contact information.

The real-world connection to learning for our students is crucial to their success and progress toward their goals in their work and in their lives. We thank you for helping each one of them reach his or her fullest potential.

Your input and ideas are always welcome! We look forward to the weeks ahead and to your getting to know our students!

Sincerely,

Michael Taylor, Director  
ACE Academy for Architecture, Construction, and Engineering
