

COMPCHAT

Musculoskeletal injuries and illnesses: prevention strategies and how to deal with difficult cases

- **Prevention strategies**

Discuss diagnoses, treatment, and prevention of several common musculo- skeletal injuries and illnesses of the shoulder, back and knee. Discuss perceptions held by injured workers and employers, extended recovery times and related issues, return to work successes and failures, and other prevention strategies.

Presenter: Linda Meuleveld, RN, COHN-S, CCM, Occupational Health Trainer & Consultant, SAIF Corporation

- **How to deal with difficult cases – a provider's perspective**

A physician shares his experience dealing with difficult cases and explains how the employer's active involvement is a key component to injury prevention as well as promoting healing and return to work.

Presenter: Dr. John Braddock, MD, Cascade Occupational Medicine

Tuesday, May 4, 2010 - 9:00-11:00 AM
AGC Center, 9450 SW Commerce Circle, Suite 200
Wilsonville, Oregon
